

FUND APPROACH AND STYLE

Morningstar Style Box ®

as at 31.03.10

OBJECTIVE

The Fund's investment objective is to achieve long term capital growth from a diversified portfolio primarily made up of the shares of companies from around the world. In terms of geographical split, the portfolio is invested broadly in relation to the relative sizes and attractiveness of world equity markets. Within the portfolio there is a bias towards the larger quoted companies in each market, but the ACD is not restricted in this regard, or in terms of the industrial or geographical split of the portfolio.

NB: Derivatives may also be used for efficient portfolio management purposes

PORTFOLIO CHARACTERISTICS

The fund holds between 100 and 150 stocks and is therefore much more concentrated than its comparative benchmark, the MSCI World Index, which is comprised of nearly 2000 stocks. The fund manager does not refer to benchmark sector and country weights when constructing the portfolio. Sector and country exposures are a by-product of Fidelity's bottom-up, stock selection approach. Risk is controlled through holding a well diversified selection of thoroughly researched companies.

INVESTMENT STYLE

The fund manager seeks to identify growth situations at a reasonable price, for example, companies with a degree of pricing power in their markets or the ability to produce goods at low cost. Such companies are likely to yield higher returns on invested capital and free cash flow and, over time, this should lead to higher growth in earnings and dividends, or share buy-backs. The fund has a growth bias, but the manager may select individual companies exhibiting value characteristics.

RATINGS

Overall Morningstar Rating™ ★★★★★

VOLATILITY AND RISK

Risk/return rating: (Equity funds)

E1 E2 E3 **E4** E5

Relative volatility:	1.09	Beta:	1.02
Sharpe ratio:	0.21	R ² :	0.88
Alpha:	0.26	Tracking error:	7.44

This rating gives an indication of the risk level of Cash (A1-A2), Bond (B1-B3) and Equity (E1-E5) funds only in relation to Fidelity's range of funds within each asset class. A higher number signifies a higher risk fund. They are intended only as a guide and are based on our quarterly rating review process which uses information about a fund manager's investment approach, as well as quantitative measures based on the fund's historic performance and its current holdings.

Tracking error

The chart above shows the tracking error of the fund against its benchmark. The calculation uses rolling three year periods. The chart shows a maximum of 36 monthly data points, starting no earlier than three yrs after the fund's performance start date.

This fund essential is for Investment Professionals only, and should not be relied upon by private investors. Please note this fund may not be registered in all jurisdictions, for more information please consult the latest available prospectus or your usual Fidelity contact. Reference in this document to specific securities should not be construed as a recommendation to buy or sell these securities, but is included for the purposes of illustration only. Investors should also note that the views expressed may no longer be current and may have already been acted upon by Fidelity. Top security holdings are those securities in which the largest percentage of the fund's total assets are invested. They do not include FX forwards, derivative positions and deposits. A full list of holdings, including derivatives, can be found in the respective fund's annual and/or semi-annual report and accounts. Past performance is not a guide to future returns. The value of investments and the income from them can go down as well as up and investors may not get back the amount invested. For funds that invest in overseas markets, changes in currency exchange rates may affect the value of an investment. Investments in small and emerging markets can be more volatile than other more developed markets. Due to the greater possibility of default an investment in corporate bonds is generally less secure than an investment in Government bonds. Source of performance: Morningstar.
