

FUND APPROACH AND STYLE

The Fund's investment objective is to achieve long term capital growth from a portfolio primarily made up of the shares of companies around the world. The Fund will have a blend of investments in larger, medium and smaller sized companies. The ACD is not restricted in its choice of companies either by size or industry, or in terms of the geographical split of the portfolio, and will choose stocks largely determined by the availability of attractive investment opportunities. The Fund may also invest in other transferable securities, units in collective investment schemes, money market instruments, cash and deposits. Derivatives and forward transactions may also be used for investment purposes.

NB: Derivatives may also be used for efficient portfolio management purposes

RATINGS

S&P fund ratings

A

Morningstar Style Box ®

Top security holdings are those securities in which the largest percentage of the fund's total assets are invested. They do not include FX forwards, derivative positions and deposits. A full list of holdings, including derivatives, can be found in the fund's annual and/or semi-annual report and accounts. The attribution analysis similarly does not include contributions from derivatives. Source of fund performance is Fidelity. Basis: nav-nav with gross income reinvested. Market indices are sourced from RIMES and other data is sourced from third-party providers such as Morningstar.

VOLATILITY AND RISK

Risk/return rating

E 1 E 2 E 3 E 4 E 5

This rating gives an indication of the risk level of Cash (A1-A2), Bond (B1-B3) and Equity (E1-E5) funds only in relation to Fidelity's range of funds within each asset class. A higher number signifies a higher risk fund. They are intended only as a guide and are based on our quarterly rating review process which uses information about a fund manager's investment approach, as well as quantitative measures based on the fund's historic performance and its current holdings.

Please note this fund may not be registered in all jurisdictions, for more information please consult the latest available prospectus or your usual Fidelity contact. Reference in this document to specific securities should not be construed as a recommendation to buy or sell these securities, but is included for the purposes of illustration only. Investors should also note that the views expressed may no longer be current and may have already been acted upon by Fidelity. Past performance is not a guide to future returns. The value of investments and the income from them can go down as well as up and investors may not get back the amount invested. For funds that invest in overseas markets, changes in currency exchange rates may affect the value of an investment. Investments in small and emerging markets can be more volatile than other more developed markets. Due to the greater possibility of default an investment in corporate bonds is generally less secure than an investment in Government bonds.
