

FUND APPROACH AND STYLE

The Fund's investment objective is to achieve long term capital growth from a diversified portfolio primarily made up of the shares of companies from around the world. In terms of geographical split, the portfolio is invested broadly in relation to the relative sizes and attractiveness of world equity markets. Within the portfolio there is a bias towards the larger quoted companies in each market, but the ACD is not restricted in this regard, or in terms of the industrial or geographical split of the portfolio.

NB: Derivatives may also be used for efficient portfolio management purposes

Source for all performance shown: Morningstar, Inc 30.04.10, performance calculated bid to bid, net income reinvested, in GBP. These figures do not include an initial charge. Performance data is not provided for any fund that has been operating for less than 12 months.

These figures relate to the fund's past performance, which is not a reliable indicator of future results.

The value of investments and any income from them may go down as well as up and an investor may not get back the amount invested. If a fund invests overseas, currency fluctuations may affect its value.

* Quartile rank refers to performance over time rated on a scale of 1-4. A ranking of 1 indicates that the item being ranked is in the top 25% of the sample; a quartile of 2 indicates it's in the top 50% and so on.

Top security holdings are those securities in which the largest percentage of the fund's total assets are invested. They do not include FX forwards, derivative positions and deposits. A full list of holdings, including derivatives, can be found in the fund's annual and/or semi-annual report and accounts. The attribution analysis similarly does not include contributions from derivatives. Source of fund performance is Fidelity. Basis: nav-nav with gross income reinvested. Market indices are sourced from RIMES and other data is sourced from third-party providers such as Morningstar.

RATINGS

Overall Morningstar Rating TM

Morningstar Style Box ®

VOLATILITY AND RISK

Risk/return rating

This rating gives an indication of the risk level of Cash (A1-A2), Bond (B1-B3) and Equity (E1-E5) funds only in relation to Fidelity's range of funds within each asset class. A higher number signifies a higher risk fund. They are intended only as a guide and are based on our quarterly rating review process which uses information about a fund manager's investment approach, as well as quantitative measures based on the fund's historic performance and its current holdings.

Please note this fund may not be registered in all jurisdictions, for more information please consult the latest available prospectus or your usual Fidelity contact. Reference in this document to specific securities should not be construed as a recommendation to buy or sell these securities, but is included for the purposes of illustration only. Investors should also note that the views expressed may no longer be current and may have already been acted upon by Fidelity. Past performance is not a guide to future returns. The value of investments and the income from them can go down as well as up and investors may not get back the amount invested. For funds that invest in overseas markets, changes in currency exchange rates may affect the value of an investment. Investments in small and emerging markets can be more volatile than other more developed markets. Due to the greater possibility of default an investment in corporate bonds is generally less secure than an investment in Government bonds.
