Consensus Fund Past Performance

Wisdom of Ireland's leading investment managers

By taking the average asset mix of the leading Irish investment managers, the Consensus fund is able to avoid the risks associated with reliance on the decisions of just one fund manager. Managing assets in line with the index removes the risk associated with some active managers' poor decision making. The high equity content (usually between 60% and 80%, currently it's 74%) gives the Consensus fund excellent growth potential.

How Consensus has performed

The table above gives you an idea of how a one-off investment in the **bonussave** Consensus Fund would have performed over the last 5 years between February 2003 and February 2008. This has been a period of strong economic growth which is reflected in the performance of the fund. Since its launch twelve years ago, the Consensus Fund has had an average return of 7.74% (before tax and after management charges) a year, over the last 12 years.

With **bonussave** because you save a regular amount each month you are buying units in the fund on an ongoing basis. Therefore in order to give a clearer picture of the returns you would have received it is useful to look at an example. If you saved €250 a month from February 2003 to February 2008, you would have made payments of €15,000. In this example, the plan value after tax and charges in February 2008 would have been €16,451 based on the past performance above.

| Year | Total Payment Amount | Plan Value after tax and charges |
|------|----------------------|----------------------------------|
| 1 | €3,000 | €3,114 |
| 2 | €6,000 | €6,408 |
| 3 | €9,000 | €10,598 |
| 4 | €12,000 | €14,582 |
| 5 | €15,000 | €16,451 |

Warning: **bonussave** Consensus Fund may be affected by changes in currency exchange rates. Past performance is not a reliable guide to future performance. The value of your investment may go down as well as up.
