

# Medmark Xpress offers you...

**Up to 80%** conversion rate  
from referral to appointment

## **24-72 hours**

final medical report is available 24-72 hours  
from date of your client's appointment

## **A better experience**

for your client in that we contact them  
directly to arrange their appointment

Xpress, created by Medmark, is Ireland's first Irish owned online system which allows an insurance company to refer a client directly to our medical service for an insurance medical. With seven surgeries located around Ireland we can arrange an appointment at a location that is most convenient to your client.

## **Benefits to you...**

### **time, money & a better experience**

We aim to complete the medical within 24-72 business working hours from the date of your client's appointment. We simplify the 'appointment making' process by contacting the client directly to schedule an appointment. We can update your broker when requested. Xpress keeps you informed about what stage the medical is at, by simply logging in. This leads to better communication, greater efficiencies and a more cost effective service, as it is run from one point of contact at Medmark.

Once the medical is completed it is available to download immediately, this avoids any delays associated with postal communication. Xpress is confidential and secure – we have used the necessary security and auditing software to ensure this.

And finally, we believe that Xpress makes it better for your client, your broker and you as a member of the underwriting team.

If you have any queries, or would like more information on how to use Xpress contact Amanda or Veronica at: 061 444888 or [xpress@medmark.ie](mailto:xpress@medmark.ie)
