Source for all performance shown: Morningstar, Inc 30.04.10, performance calculated NAV to NAV, gross income reinvested, in USD. These figures do not include an initial charge. Performance data is not provided for any fund that has been operating for less than 12 months.

These figures relate to the fund's past performance, which is not a reliable indicator of future results. You may get back more or less than this as a result of currency fluctuations.

The value of investments and any income from them may go down as well as up and an investor may not get back the amount invested. If a fund invests overseas, currency fluctuations may affect its value.

* Quartile rank refers to performance over time rated on a scale of 1-4. A ranking of 1 indicates that the item being ranked is in the top 25% of the sample; a quartile of 2 indicates it's in the top 50% and so on.

VOLATILITY AND RISK

Risk/return rating

This rating gives an indication of the risk level of Cash (A1-A2), Bond (B1-B3) and Equity (E1-E5) funds only in relation to Fidelity's range of funds within each asset class. A higher number signifies a higher risk fund. They are intended only as a guide and are based on our quarterly rating review process which uses information about a fund manager's investment approach, as well as quantitative measures based on the fund's historic performance and its current holdings.

Please note this fund may not be registered in all jurisdictions, for more information please consult the latest available prospectus or your usual Fidelity contact. Reference in this document to specific securities should not be construed as a recommendation to buy or sell these securities, but is included for the purposes of illustration only. Investors should also note that the views expressed may no longer be current and may have already been acted upon by Fidelity. Past performance is not a guide to future returns. The value of investments and the income from them can go down as well as up and investors may not get back the amount invested. For funds that invest in overseas markets, changes in currency exchange rates may affect the value of an investment. Investments in small and emerging markets can be more volatile than other more developed markets. Due to the greater possibility of default an investment in corporate bonds is generally less secure than an investment in Government bonds.
