

Protected Consensus Bond

Protected Consensus Bond gives you a unique combination of capital security and a higher growth potential linked to some of the performance of one of Ireland's most popular funds - the Consensus Fund.

Built-in security features

The Protected Consensus Fund gives two important safety features.

1. The amount invested is protected at the end of six years.
2. A unique 'lock-in' feature gives added security by protecting 80% of the highest value of the investment over six years.

The capital protection outlined above will be reduced to allow for any withdrawals.

How the Protected Consensus Fund works

- At the start, 80% of the performance of the Protected Consensus Fund will be based on the returns from the Consensus Fund. This amount will change depending on how the Consensus Fund performs.
- If the Consensus Fund returns go up
The level of the Protected Consensus Fund linked to the performance of the Consensus Fund will generally be increased to take advantage of that growth, and the amount linked to bonds will be reduced. A maximum of 100% of the Protected Consensus Fund could be linked to the Consensus Fund returns.
- If the Consensus Fund returns go down
The level linked to the performance of that fund will generally be reduced, and the amount linked to the bonds will be increased.

At all times, at least 15% of the Protected Consensus Fund will be linked to the Consensus Fund returns.

The initial investment mix

This mix will change over the six year investment period.

This table shows the past performance before tax and after charges to 01 February 2008 for investors who started on each of the above dates from when the Protected Consensus Bond commenced on 11 April 2006. It also shows the level of each Protected Consensus Fund that is linked to the performance of the Consensus Fund as of 04 February 2008. The Protected Consensus Bond is designed for an investment period of six years. This is a brief update on the Protected Consensus Bond. Full details are given in the product booklet which should be read before you start an investment.

Protected Consensus suitability

- You want to invest your money for six years.
- You want an investment that protects your money and 'locks-in' 80% of the highest value of your investment at the end of the six-year period. You realise that your potential for growth is lower than if you invested directly in the Consensus Fund.
- You are looking for an investment that gives you the potential for better returns than a deposit account but you do not need to have a specific level of return.

Warning: The value of your investment may go down as well as up. Past performance is not a reliable guide to future performance. Protected Consensus Bond may be affected by changes in currency exchange rates.

Information is correct as at 01 January 2008. Past returns for the Consensus Fund are taken from the Mercer Pension Fund survey. Irish Life Assurance plc is regulated by the Financial Regulator. Full details are given in the product booklet which should be read before you start an investment.
