Style		Actively Managed
Size		New Fund
Asset Mix		Equities
No. of Stocks		40
Volatility/Risk		High risk

The Tomorrow's World Fund uses Irish Life's unique research process to identify "value" companies on a global basis which also strongly embrace the principles of corporate responsibility.

Objective

- To give investors the opportunity to invest in companies that place a strong emphasis on corporate responsibility, sustainability and environmental issues.
- Corporate sustainability is a business approach that creates long-term shareholder value by embracing opportunities and managing risks deriving from economic, environmental and social developments.

Operation

- Around 80% of the fund will be invested equally in around 40 stocks throughout the world which adhere and comply with the Dow Jones Sustainability Index requirements.
- The fund will also seek to take advantage of the growth opportunities in the global environmental sector by investing in a basket of "clean energy" companies (solar, wind power etc) and water companies. The fund will have significant global exposure (approx 20%) to this sector.

Highlights

- The fund will include companies which are members of the Dow Jones Sustainability Indices. Launched in 1999, the Dow Jones Sustainability Index are the first global index tracking the financial performance of the leading sustainability-driven companies worldwide.
